

Will the water/sewer lines questioned in Parks Commission meetings look like this?

1b) Design Strategy

'Minimal impact, meeting criteria, exceeding expectations, and creating a source of pride for the community' reflect an admission of destruction and a flawed sense of Springside. The impact of such construction is known to literally and figuratively uproot the beauty of a central, visible part of the park. Springside has been a source of unique natural pride for the people of Pittsfield, Berkshire County, New England, and the world for over a century. To pretend otherwise is disingenuous. Any strategy to compromise its qualities is wrong.

The latest craze among mountain bikers is the creation of 'pump tracks' and bike parks. They are alleged to teach bicycling skills, but what they actually teach are 'skills' (skidding, jumping, 'getting air,' racing, etc.) that are appropriate *nowhere*. If you believe that these 'skills' won't be practiced throughout the rest of the park and in all other parks, we have a bridge we'd like to sell you in Brooklyn.....
