

## 2) Proposed Inclusions and Concept Examples

### 3) Portfolio

These images show the proposed structures to go in a bike park, including the Velosolutions © asphalt pump track, 2 examples of a skills course, a flow zone, a dual slalom – for ‘collegiate, high school and head-to-head professional racing’ – and other constructions from Kene, NH (by Powder Horn Trail LLC), Colorado Springs, CO (by Progressive Bike Ramps LLC), and Redmond, OR. ‘LLC’ means ‘Limited Liability Company,’ providing the same limited liability as a corporation, but LLCs are easier and cheaper to form and run. However, unlike financial loss, personal injury liability as a result from an LLC construction, in this case the mountain bike complexes, is *not limited*.

So the bike park being proposed is for kids? It is apparent that this is a hyped cover for its actual use, an adult racing complex at all levels, including professional. Similar to this complex?
